INTRODUCTION

In the intervening years since Karen Caviglia, Karen Hopkins and Audrey Ritter produced a **Selected Bibliography prepared for Libraries Establishing a Deafness Collection**, a plethora of information has been published related to deafness and hearing loss.

Recent events, such as the Gallaudet protest for a deaf president, the establishment of the New York State telephone relay and the growth of sign language classes offered at colleges and universities, have increased public awareness and interest about people who are deaf or hearing impaired.

This bibliography is an attempt to make public librarians more cognizant of the literature related to deafness.
